

Free Health Resources Page Layout

Hero

Use a clear heading, one short paragraph, and a restrained CTA to browse the guide cards. Avoid a marketing-heavy landing page.

Guide cards

Use five download cards with cover preview, title, one-sentence description, page count, tags, review date, and accessible download button.

Trust and safety

Include a concise medical disclaimer, publication dates, and a note that guides are educational and not personalized care.

Secondary CTAs

Add newsletter, Health Tools, volunteer, and support links below the guide cards so education remains primary.
